## INFO

### SUPPLY-DEMAND VIRTUAL INFORMATION (SDVI)-FAMA

SDVI is a virtual storage and access database functioned to supply, analyze, and spread information on prices, supply and demand of agricultural products online. The information serve as market potential guidance of a commodity in local and foreign market, to assist decision making in investments. It can also links between agriculture marketer and producer. SDVI is complete with geographical commodity data that utilizes Global Positioning System (GPS). Analysis and report is summarized through statistical analysis system (SAS) and geographical information system (GIS). Data and information collected and logged into SDVI is worldwide accessible online through [www.fama.gov.my](http://www.fama.gov.my)
