INFO

Halal Apps by Halal Industry Development Corporation (HDC)

Halal Apps is the first government Halal Certified premise locator in Malaysia. The first module is developed to assist users to accurately locate halal food premises using the Global Positioning System (GPS) technology and the Google Maps. Through this apps, users are able to locate halal food premises and restaurants certified by JAKIM within 15km radius from the current location. This software application is also equipped with performance monitoring system where users could rate the cleanliness of the food premises or restaurants. For the second and the third modules, users can obtain mobile access on the halal directory as well as the halal industry news. For more info, kindly click [HERE](#).
